

Figure 1.1: Venn-diagram of research fields encompassing this work.

*i* Note

We call the other two plots with some publication stats using the below. See quarto documentation for many ways to plot multiple images. Make sure to leave a line spacing between code as below. The last {} declares sizing, cross-ref tегs and caption locations.

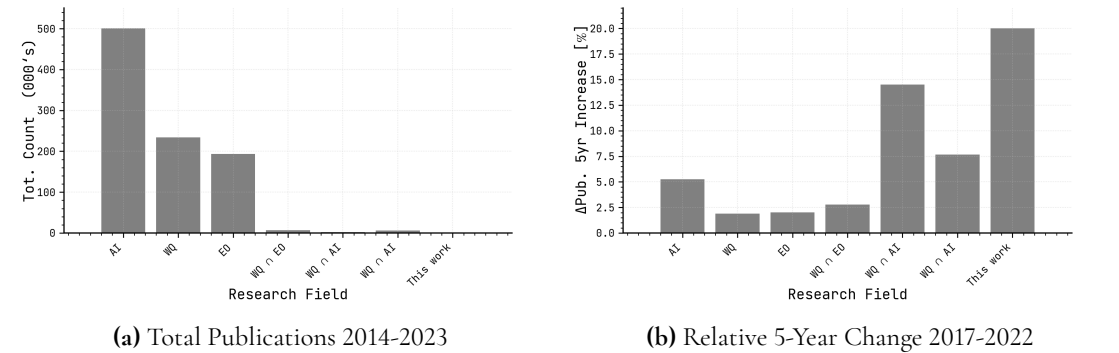

Figure 1.2: Analytical view of prior work in some research fields per Figure 1.1, including their intersections. @ is how all references occur from .bibs to sections etc. But you can use latex etc too. P.S. This is the figure caption.
